SHAFFER, RICHARD R

ART UNIT

PAPER NUMBER

3733

SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	03/30/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/500,944	Applicant(s) LECHOT, ANDRE	
	Examiner Richard R. Shaffer	Art Unit 3733	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 March 2007.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-12 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION***Terminal Disclaimer***

The terminal disclaimer filed on December 8th, 2006 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of application 11/257,417 has been reviewed and is accepted. The terminal disclaimer has been recorded. The corresponding provisional double patenting rejection is hereby withdrawn as well.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Salyer (US Patent 6,001,105).

Salyer discloses an acetabular reamer (**Figures 1-7**) comprising: a hemispherical cutting shell (**14**); a series of cutting teeth (**26**) arranged uniformly and spaced apart in a spiral formation (**Figure 1; Column 4, Lines 64-68**); the cutting teeth (**26**) all having a matched cutting edge connected to the shell (**14**) by adjacent rise portions (the rise portions being the extensions down from the top cutting arc and into the shell); the teeth

Art Unit: 3733

shaped according to form a hemispherical region for an implant; and circular holes (28) precede the cutting edges when the acetabular reamer is rotated (**Column 3, Line 35-36**). The device uses less teeth than other conceived of devices because the device has cuts without using the full surface area of the shell (which otherwise could include teeth). Further, the device removes more material than other possible cutting arcs due other devices possibly not extending as high from the shell surface or being narrow in width along the height such as a needle or spike structure.

Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Temeles (US Patent 6,283,971).

Temeles discloses an acetabular reamer (Figures 1-8) comprising: a hemispherical cutting shell (12); a series of cutting teeth (28) arranged uniformly and spaced apart in a spiral formation; the cutting teeth (28) all having a matched cutting edge connected to the shell (14) by adjacent rise portions (the rise portions being the extensions down from the top cutting arc and into the shell); the teeth shaped according to form a hemispherical region for an implant; and circular holes (20) precede the cutting edges when the acetabular reamer is rotated. The device uses less teeth than other conceived of devices because the device has cuts without using the full surface area of the shell (which otherwise could include teeth). Further, the device removes more material than other possible cutting arcs due other devices possibly not extending as high from the shell surface or being narrow in width along the height such as a needle or spike structure.

Response to Arguments

Applicant's arguments filed March 5th, 2007 have been fully considered but they are not persuasive. Applicant contends that the new limitation of "connected to the shell by adjacent rise portions" define over Salyer and other cited prior art. This is not found persuasive given the broadest reasonable interpretation of the claim language. A portion is merely a section of an element. Since the cutting edge can be treated as the top arc portion, then the portions extending on either side down (as well as slightly behind as applicant's device is disclosed as having) to the reamer shell can be treated as the rise portions. The only clear distinction between applicant's invention and that of the prior art device of Salyer is that the section furthest from the shell is relatively flat for a significant portion whereas in Salyer, the furthest section is clearly rounded.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard R. Shaffer whose telephone number is 571-272-8683. The examiner can normally be reached on Monday-Friday (7am-5pm).

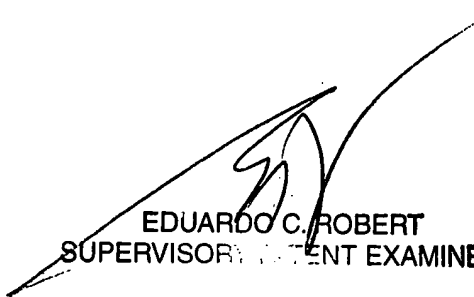

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 3733

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
